Please allow xm radio to continue offering the outstanding service that is not available with "free radio". Unlike XM, free radio does not always provide the service desired by the consumer. Local radio stations gear their service according to what the advertisers want, of course the advertisers are paying. With XM, we pay, therefore, we get what we want. Also, local stations are providing information that the local residents want or is geared to please the local residents, for example, listen to the contests, gimmicks ect. The same is to be mentioned when it comes to the traffic information, it is provided for the local residents, if you don't believe that to be true just go to Chicago and try to listen to the local traffic reports, if you do, you better know what highways the Dan Ryan or the Stevenson Expressway are. A local resident would know what highways those are, but tourist or people just traveling through would only know those highways as Interstate 94 or 57. Allow XM to continue offering the outstanding service that we elect to pay for. Maybe local radio stations will learn to improve the service they offer instead of depending on the government to protect them.
